

Pedestrian Recycling Program

According to the American Beverage Industry, bottles and cans are among the most recycled consumer packaging in the United States. Recycling materials, such as plastic bottles, turn these items which would otherwise become waste into valuable resources.

The City of Deer Park was awarded a Solid Waste Grant funded in part by the Houston-Galveston Area Council and the Texas Commission on Environmental Quality for the purchase of sixty 50-gallon new recycling bins and two solar powered BigBelly trash compactors with recycling units to start off the Deer Park Pedestrian Recycling Program. The sixty recycling containers will be divided between the Girls Softball Complex, 500 W. X Street, and the Spencerview Athletic Complex, 4514 Durant Street. The BigBelly trash compactors with recycling units are located at City Hall, 710 E. San Augustine, and the Community Center, 610 E. San Augustine.

Although recycling is not mandatory, we strongly encourage your participation. Please do your part to help the community you live, work, and play in. The Deer Park Pedestrian Recycling Program needs your support and participation to be successful.

For more information, contact the Deer Park Parks & Recreation Dept. at 281-478-2050.
